

FOSS

ENERGY SERVICES

Foss Energy Services understands and promotes the importance of integrity as well as the significance of safety in everything we do. Our commitment to our clients is to complete every project with quality work, on schedule, and on budget all while ensuring every safety precaution and regulatory compliance necessary. Our goal is to provide a quality service that not only meets but exceeds our client's requirements and expectations, and providing competitive pricing while taking care of the environment.

We are used to fast pace, meeting the Company's needs, and deadlines to frequent frac schedule changes. With a broad service area from Texas, New Mexico to Louisiana we have the capabilities of handling almost all service needs.

The management group that we have built are very experienced in performing effectively in tight scheduling and changes in the scope while keeping safety first.
